DETAILED ACTION

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Figures 1-3 showing a rangefinder on the barrel of a firearm.
- II. Figure 6 showing a rangefinder on a bow.
- III. Figures 7-9 showing a rangefinder on a scope.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 27 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Scott Lundberg on 6-25-04 a provisional election was made without traverse to prosecute the invention of Group II, claims 1-11 and 27-29. Affirmation of this election must be made by applicant in replying to this Office action. Claims 12-26, 30, and 31 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 3644

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-11 and 27-29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Zykan et al.

See especially Figures 3 and 4, and column 6, lines 19-39. It is noted that, without further limitations, the bar (and sight) that the laser is mounted upon reads on “a counter weight bar” and the fastening means of the bar and sight reads on “a counterweight insert.”

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holmberg, Eldridge, and Hines et al are cited as being of interest since they disclose laser rangefinders and Holmber is a parent case of the current application.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 703-306-4151. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..
